Representation, subjectivity and sexuality continue to be central to scholarly inquiry in the humanities and social sciences. Deciphering Culture explores their relationship, each author taking a distinct approach to the concept of 'curiosity' as a way of deciphering the working of particular cultural formations. In the process they address a variety of topics including: * the historical formation of subjectivities, identities and differences * cultural conduct and habits of the self * everyday cultures and negotiation * consumption and the body * memory, history and autobiography * the ethics of critical and textual inquiry. This fascinating book will appeal to students and academics from a variety of disciplinary backgrounds in the social sciences and cultural studies.
