Tacitus' *Dialogus de Oratoribus* is his most neglected work - there has not been an English-language commentary in over a century - and yet it is arguably his most original. Although among his earliest writings it shows complete mastery of the dialogue form and of Ciceronian idiom. It makes an original contribution to the continuing first-century AD debate about the role of oratory in Rome under the Principate, and raises the question of what a man can do to secure lasting renown. This edition contains a substantial introduction discussing such matters as the place of the work in the author's oeuvre, its style and layout. The commentary is designed to explain not only the language, and its subtle reformation of the Ciceronian idiom, but also the large issues mentioned about the decline of oratory, and the best career for a man to follow.
