Providing critical as well as pragmatic analysis, this volume examines the education programs that form an integral part of U. S. community colleges and their models abroad. The book's 15 original essays examine a variety of international and inter/multicultural education programs at selected North American community colleges and explore how the U. S. community college model is utilized in other nations. The book includes 11 tables/charts, three maps, four diagrams/figures and a subject index.
