The first sourcebook to All Flesh Must Be Eaten opens whole new vistas for a walking dead campaign. This tome brings together the thrills of Hong Kong action films and the excitement of flesh-craving horror. The match of these two genres may not have seem obvious at first, but the pleasures that arise from it are undeniable. After all, zombies and Hong Kong style action make a perfect fit. What better match is there for a relentless series of lightning kicks and a hurricane of bullets than a target that can't die? The pulse-pounding danger just never stops. Besides, what martial arts master worth his salt doesn't ache for the ability to use his own intestines as a deadly whip? For the undead, no problem
