Every shape and pattern can be found in the nature In "EyeLike Shapes and Patterns," your child will be thrilled to find the shape connections: the triangle of a shark's fin, the oval of a perfect egg, and the crescent of the moon or a curvy cat's tail. Every spectacular spread is an opportunity to see shapes and patterns in the world around us. Give your children books to build basic skills and stimulate a love of reading that will last a lifetime. Inspired by nature, this best-selling series is a fun, innovative way for kids to see, learn, and grow. Colors, Numbers, Shapes, and more, come alive in 32 full-color spreads loaded with bold, eye-catching photographs. Nature can be an excellent teacher
