Family Values shows how the various contradictions at the heart of Western conceptions of maternity and paternity problematize our relationships with ourselves and with others. Using examples from philosophical texts, psychoanalytic theory, studies in biology and popular culture, Kelly Oliver challenges our traditional concepts of maternity which are associated with nature, and our conceptions of paternity which are embedded in culture. Engaging such thinkers as Locke, Rousseau, Hegel, Husserl, Heidegger, Merleau-Ponty, Sartre, Levinas, Derrida, Kristeva, Koffman, Irigaray and others, Oliver examines an enormous range of both classic and contemporary texts in her groundbreaking analysis of age-old conceptions of woman and man, maternity and paternity, nature and culture, and subjectivity and ethics.
