Morgan Taylor was terrified of flying. Shocking visions of fatal falls and explosive crashes shook loose with each thump of the plane. The electrical storm didn't help much, nor did his sister Kelly. The thought of his father waiting at the boarding gate was the only thing pushing back his fear and swelling panic. Then a horrified scream brought Morgan's worst fears to life. Morgan and Kelly learn the horrible secret of an unseen war: a war being waged in our very bedrooms while we sleep. Invisible battles fought between dark and sinister visitors grappling to secure the survival of their race . . . And others who struggle desperately to bring us a grave warning before it's too late. Be aware . . . We are not alone.
