The need to achieve the latest QTS standards for teaching can often stifle innovation and reflective thinking. Written specifically to help guide student teachers through their training, this book provides a comprehensive introduction to all aspects of teaching

within the primary school. It helps student teachers to achieve both the requirements for Qualified Teacher Status, and also a fuller understanding and appreciation of teaching as an evolving and reflective profession through an emphasis on: effective relationships and motivation as essential factors in learning; developing timeless and transferable teaching skills; reactivating thinking skills; and, promoting creativity and innovation within the classroom. With new material on inclusion, SEN, legal issues, ICT and teaching assistants, this new edition remains essential reading for all student teachers on initial teacher training courses at the primary level.
