isbn:9780198237389

This collection of specially commissioned essays focuses on the forms, functions, and uses of contemporary German in the period of dynamic change following reunification. Some contributors address broad issues language and national identity, the status of German as an international language, language change and attempts to fix the form of the language, and sociolinguistic variation while others examine topics of particular significance in the current sociopolitical climate. These include social change and linguistic variation in Berlin after the Wall, the political language of the Right and Left, the speech of youth subcultures, language and gender, language and television, and language in intercultural communication. Reviews of the hardback edition 'This volume fills a void in up-to-date English-language information on German linguistics. Highly recommended for all college and university collections, as well as public libraries.' Choice, 33: 3, November 1995 'The appearance of this collection is timely...it updates us on important, immediate issues affecting German language and society' '...while this work will be appreciated most by those focusing on sociolinguistics in the German-speaking context, those searching for comparative sociolinguistic material will find it a valuable source as well. ' 'All in all, Stevenson has organized an interesting and useful volume for Germanophile sociolinguists and for those interested in a multidimensional real German.' Language Learning, 46:1, March 1996.
