In the final decades of its existence the Ottoman Empire was a focus of international

rivalry among European Great Powers. Historians of the foreign policy, especially the Turkish policy, of these Great powers, have come together to address some of the important questions posed by the fall of the Ottoman Empire, following the First world War, to the victorious Allied Powers and to the forces of militant nationalism led by Kemal Atatnrk. This collection is the fruit of their researches, presented for the first time in one unified volume.
