Tiffany Rose, chief librarian on the cruise ship Seafarer's Memories, is having a bad day-actually, it's a bad cruise. She's just getting over the flu, her food is stolen, and library books are missing. Are these just practical jokes, or is there something sinister behind them? When Tiffany is thrown overboard and almost drowns, she realizes that there is more to these pranks than the other crew members realize. The culprit manages to stay clear of the crew, but when one crew member dies, another is beaten almost to death, and a third is poisoned, Tiffany realizes she has to face her adversary to end the horror. Set in the year 2035, How Not to Lose a Librarian is a sequel to Sherry's first novel, How Not to Cruise the High Seas.
