Humansvilleaa small, peaceful Midwestern tourist trap, until the springtime arrival of four mysterious figures, who oozed and writhed their way out of nearby Stockton Lake. While the figures look and act human, there is something vaguely determined and desperate in their acts of cruelty and sadism. Are the four figures infiltrating Humansville, and its simple townsfolk, truly humans, committing acts of basic human evil? Or do their deeds mean something? A sinister connotation of the supernatural? Who is the aFathera each of the four men keep speaking of? Why are there now hordes of rats infesting the walls of the downtown bed and breakfast? And why are the four men so obsessed with aWorka? As the small Missouri town begins to unravel answers, their town begins a new genesis and becomes a epicenter for theological horror on a biblical scale.
