Cited by one reviewer as "a work of stunning originality," this new text presents philosophy both as a collection of fundamental problems and as a method to solve problems, the method of critical thinking. Students become active participants in doing philosophy, in using the method of philosophy as philosophers do when they are thinking well. The various parts of the text are organized to reflect a recurring pattern of critical thinking, and exercises are provided throughout the text to sharpen these thinking skills in the context of solving philosophical problems. In addition to addressing individual philosophical problems, this text also encourages students to integrate their solutions into a coherent worldview.
