isbn:9780735505452

The authors provide practical information that can be used by all construction industry

professionals, as well as detailed analyses of California construction law-both as codified in the statutes and as expressed by California courts. The topics in the book are organized in the same manner as they would actually arise in a construction project. First, it deals with pre-construction issues-licensing, bidding, and the formation of the construction contract. Then it discusses what happens when things go wrong-breach of contract by the owner and/or the contractor. An in-depth analysis is provided with regard to claims involving delay, disruption, and acceleration. Several chapters are then devoted to statutory remediesmechanics' liens, stop notices, and bonds both on public and private works. Finally, coverage is provided on other issues and subjects involving the construction industry, including expanding liability, construction defect issues, bankruptcy, and alternative dispute resolution.
