'William Christian has given us an extremely sensitive study of man, religion and society in a valley in Northern Spain...The reader somehow experiences the passing of the generations and the centuries, the succession of priests with different views, each representative of the Catholicism of his time, the propagation and then institutionalization of ever-changing forms of worship, and the tension set up between innovating priest and conservative community...All in all I find this a truly admirable book. Not only will it be of value to students of the subject, it should also give them much pleasure.' -Emanuel de Kadt, Religion
