This book is of particular interest to scholars whose interest is in New Testament, historical Jesus, hermeneutics and historiography study. Donald Denton refers to the emergence of distinct approaches to historical Jesus studies, which are based on similarly distinct conceptions of the historiographic enterprise and how it relates to basic hermeneutical concerns. Trends have developed in Jesus studies that can be categorized in terms of these historiographic and hermeneutical issues. An understanding of these trends will help the observer of, and participant in, historical Jesus studies to sort through the surplus of current options from a basis of informed decisions about the root issues that guide historical investigation. This is volume 1 in the Journal for the Study of the Historical Jesus Supplement Series and Volume 262 in the Journal for the Study of the New Testament Supplement Series.
