The Ethics of World Religions takes a much needed look at the ethical statements located in a number of religions, especially in Judaism and Christianity. Rabbi Plotkin is a well known authority on both the World Religions and ecumencial relations in America and Europe. His passionate writing reflects years of ecumencial encounters with an eye to understanding what unites religious expressions and creates mutual understanding and respect. In a time when moral values are tauted, Rabbi Plotkin is able to bring to the discussion the many moral values found in a number of religions populating the world today. Their importance helps us to understand why reducing morality to a few issues leaves much unsaid and undone.
