This is the second volume of a two-volume set that provides a modern account of basic Banach algebra theory including all known results on general Banach $*$ -algebras. The author emphasizes the roles of $*$ -algebra structure and explores the algebraic results which underlie the theory of Banach algebras and $*$ -algebras. Proofs are presented in complete detail at a level accessible to graduate students. The books will become the standard reference for the general theory of $*$ -algebras. This second volume deals with $*$ -algebras. Chapter 9 develops the theory of $*$ -algebras without additional restrictions. Chapter 10 proves nearly all the results previously known for Banach $*$ -algebras and hermitian Banach $*$ -algebras for $*$ -algebras with various essentially algebraic restrictions. Chapter 11 restates the previous results in terms of Banach $*$ -algebras and uses them to prove results explicitly involving the complete norm. Chapter 12 is devoted to locally compact groups and the $*$ -algebras related to them.
