出版者:Springer

出版时间:2003-11

装帧:

isbn:9780387402635

The first book on the concept and applications of ranked set sampling. It provides a comprehensive review of the literature, and it includes many new results and novel applications. The detailed description of various methods illustrated by real or simulated data makes it useful for scientists and practitioners in application areas such as agriculture, forestry, sociology, ecological and environmental science, and medical studies. It can serve as a reference book and as a textbook for a short course at the graduate level.

作者介绍:

Zehua Chen is Associate Professor of Statistics at the National University of Singapore. Zhidong Bai is Professor of Statistics at the National University of Singapore; he is a Fellow of the Institute of Mathematical Statistics. Bimal Sinha is the Presidential Research Professor at University of Maryland Baltimore County; he is a Fellow of the Institute of Mathematical Statistics and the American Statistical Association.

目录: - Introduction.

- Balanced Ranked Set Sampling I: Nonparametric.
- Balanced Ranked Set Sampling II: Parametric.
- Unbalanced Ranked Set Sampling and Optimal Designs.
- Distribution-Free Tests with Ranked Set Sampling.
- Ranked Set Sampling with Concomitant Variables.
- Ranked Set Sampling as Data Reduction Tools.
- Case Studies.
