There is a serial killer on the loose, torturing and tearing the flesh from his victims bodies. After tracking this monster for years, Detroit police are at their wits ends. Detective Daniel ODell has no choice but to solicit the help of Dr. Raymond High, a psychologist with an unexplainable gift. Dr. High has the ability to place his conscious mind into anothers and experience the memories, thoughts and emotions of that person. While using his gift on the only suspect in the murders, Dr. High opens the door to another world letting in a demon like no one could imagine. It is now up to Dr. High to destroy the demon. Through prophecy and an old prophet named Eric, the doctor and his trusted assistant Tristan will attempt to destroy the demon. Before he can do this though, the doctor must escape an unseen enemy named the Circle Of Benediction who is also seeking to kill the Doctor due to his supernatural abilities.
