Teaching Passionately: What's Love Got to Do With It? explores social foundations through multiple theoretical, collaborative, and political perspectives. This text asks and answers the questions: What is the place of love and joy in teaching and learning? In an age of standards-based curriculum and assessment, what can each teacher do to maintain the passion and creativity of teaching and learning? Concise portraits demonstrate the value of passionate pedagogy in action. Vignettes of authentic classroom experience from kindergarten through higher education encourage students to connect principles and practices.
