Gijsbert Hanekroot started his career as a photographer of rock musicians in the late sixties. Together with designer Sybren Kuiper, Gijsbert has selected 286 black and white photographs from his work. Sybren has made a unique design for the book, beautifully printed in duo tone. You will be taken on an unforgettable journey back in time by this rare compilation of pictures: seventies rock photography as you have never seen it before.

'The seventies. Hectic, exciting, creative. Constantly reinventing itself, full of self-confidence. Sometimes tiresome, but never for long. I know, because I was there. As a photographer mainly, but also as a restless young man and a music lover.' Gijsbert Hanekroot
