A shocking true account only one man can tell, "the kind...about which fiction writers can only dream."-- New York Times

When the Department of Homeland Security suspects that two former CIA operatives are at the center of plot involving money laundering and the funding of Al Qaeda-and when their supposedly comprehensive database turns up little to no information on either man-it takes onetime spy Larry Kolb to crack the case. But when Kolb begins to connect the dots, he realizes something even more sinister is afoot, and that he's on to the biggest possible con with the highest political stakes.

America at Night reads like a thriller, but the story is true and extensively documented. Kolb shows us how one well-informed individual did what all of our security agencies could not: trail two brilliant covert political operatives through a labyrinth of disguised identities and dark crimes to expose corruption at the highest levels.
