future arquitecturas emerged from the desire to show the current architecture competitions being developed in Spain and all around the world. future arquitecturas aims to disseminate the pedagogical function of the competitions in the international scene, whether they are public, private, open or restricted…with a total of five numbers per year, one of them monographic about a city in the world

which is developing through the competitions. future arquitecturas, published in a bilingual english and spanish edition, is distributed to the best architectural bookshops in Europe, America and Asia.
