

# Multimedia Introduction to Programming Using Java

[Multimedia Introduction to Programming Using Java\\_下载链接1\\_](#)

著者:David Gries

出版者:Springer

出版时间:2004-9-9

装帧:Paperback

isbn:9780387226811

This book anchors its pedagogy in the program ProgramLive that you may find at [extras.springer.com](http://extras.springer.com), a complete multimedia module in itself. Containing over 250 recorded lectures with synchronized animation, ProgramLive allows users to see, first-hand and in real time, processes like stepwise refinement of algorithms, development of loops, execution of method calls and associated changes to the call stack, and much more. The zip file also includes all programs from the book, 35 guided instruction sets for closed lab sessions, and a 70-page hyperlinked glossary. With its comprehensive appendices and bibliography, systematic approach, and helpful interactive programs on [extras.springer.com](http://extras.springer.com), this exciting work provides the key tools they needed for successful object-oriented programming. It is ideal for use at the undergraduate and graduate beginning level, whether in the classroom or for distance learning; furthermore, the text will also be a valuable self-study resource or reference volume in any programmer's library.
