装帧:Paperback

isbn:9780760334881

Available together for the first time, Don Danenburg's best-selling guides to restoring wooden powerboats are a must-have for any enthusiast in this field. Written clearly,

and with a wealth of hard-earned practical advice from over thirty years of hands-on restoring, these take the reader through every stage of restoring a classic wood boat, be it the complete keel, a new engine, dashboard refurbishment, or revarnishing - everything from replacing planking to the final finish and coping with varnish-run, repainting, even carrying the boat on a trailer and successfully storing it in the winter, all are covered in exhaustive detail and step-by-step stages for beginners and experienced restorers alike. There is a section on tools to suit the job in hand, procedures explained, explanations of possibly unknown terms such as Lapstrake construction, how to mount an engine, paint a name, prepare a surface, fit planks together, stitch material to make it suitable for your vessel, which hardware and metal is suitable for where on which boat, how to wire and set gauges, treat decks and seams, all adding up to an invaluable reference work for any restoration enthusiast.
