This hugely engaging, innovative book from Ladybird is perfect for encouraging imaginative play and developing hand-eye coordination in young children. There is a friendly animal character on every page, each with a working, chomping mouth that can be pushed open and shut to simulate eating. Children will love 'feeding' the characters by placing one of the four different press-out food pieces into the open mouths, and then closing the jaws again. Either match the correct food to the

character using the rhyme and picture clues or have fun making them all eat silly things!
