isbn:9780073528137

his revision of a highly regarded book of readings in social theory has selections representing the essential elements of three periods The Classical Tradition, Contemporary Sociological Theory, and Post-Modernity. The text begins with a comprehensive general introduction as well as introductions to each of the chapters that provide bibliographical background and historical context. The chronological organization coordinates well with George Ritzer's or other primary texts in social theory. The text can also be used as a supplementary text in basic sociology courses.

作者介绍:

About the Author

James Farganis was born and raised in New York City, attended its public schools and received his B.A. from Brooklyn College and Ph.D. from Cornell University. He has taught sociology at several colleges and universities. He is now affiliated with the New School for Social Research.
