The East Asian expansion since the 1960s stands out as a global power shift with few historical precedents. The Resurgence of East Asia examines the rise of the region as one of the world's economic power centres from three temporal perspectives: 500 years, 150 years and 50 years, each denoting an epoch in regional and world history and providing a vantage point against which to assess contemporary developments. The three perspectives each have something valuable to offer towards the understanding of the present rise of East Asia and the modern world system, and their combination offers a contrast to the national and global studies that have recently dominated the literatures of development and globalization. In offering a comprehensive understanding of the present East Asian dynamic in light of the region's historical heritage, the authors present several alternative hypotheses about the ongoing East Asian renaissance, whose plausibility remains to be assessed in the light of unfolding evidence. This collection is a valuable resource for students of Asian history, international politics and Asian studies. 推荐的理由倒不是因为支持里面文章的观点，只是一个新的思路和视角。宾下对于中国朝贡体系的研究和在此基础上对日本走上军国主义的解释，到是给我提供另一个分析问题的思路。
