Ethnic minority and economically disadvantaged populations have been historically underrepresented in social science research, and despite improvements in recent years, this trend continues today. Given the rapidly changing demographics of the United States, there is an acute need for more targeted research on these populations, which requires an understanding of diversity and a more nuanced understanding of human behavior and outcomes. Unfortunately, there is a relative dearth of information in standard research texts regarding the unique methodological challenges associated with conducting research with these populations. The authors have filled that gap with a book that identifies strategies for overcoming the obstacles social scientists routinely face in these situations.
