出版者:Dover Publications

出版时间:1994-08-17

装帧:Paperback

isbn:9780486681283

One of the most influential works by a world authority on soils and their formation. This advanced treatise on theoretical soil science, long considered a masterpiece of scientific methodology offers pedologists, geologists and geophysicists both a detailed discussion of the nature of the earth's terrestrial environment, and a method of subdividing and studying it.
