How many of your students really love math? If the answer is, 'not everyone,' this

textbook is for you. It's a book filled with fun and practical ways to get young students interested in algebra and geometry. You can use the lessons as early as kindergarten and first grade. The book introduces basic concepts and actively involves children in the learning process. The challenging games, puzzles, and word problems use algebra, teaching kids to use variables for two- and three-dimensional geometry as well as arithmetic.
