This book is a must read, along with Conversations with God and The Essenes, Children of the Light by Prentis. We get insights into the complex world of the Interlife. Insights that match with much of my own training in Clairvoyance and taking responsibility for what I create. Right-wing Christians, however, will not be able to relate. You pretty much have to accept the reality of reincarnation and karma. But the truths submitted here are profound and those who cannot relate can go back to the Bible. Agreed, not for everyone. But there is information here that is hard to find anywhere else. I described Cannon's description of the Akashic Records to a friend who taught at the Berkeley Psychic Institute and she stopped and looked at me and asked, how did you know that without going there? It matched her personal experience of going to the Records exactly. There is much more to the universe than we are told in

church or at school. Are you advanced enough to be ready for these truths and this information? Not for the average person. But for the spiritually aware, a must read.

作者介绍:

Offering both comfort to the fearful and confirmation to the curious, this title examines different levels of existence in the spirit realms. What happens at the point of death? Where do we go afterwards? Does one's personality survive after death? How are the good and the bad experiences of life accounted for? What is the purpose of life? These are questions everybody asks. And no one is better qualified to provide reasonable answers than Dolores Cannon. During fifteen years of detailed research, this widely experienced and well-respected American past-life regression therapist has accumulated a mass of credible information about the death experience and what lies beyond. While reliving their dying experiences, hundreds of subjects reported the same memories. The similarity and sincerity of their recollections are too convincing to be ignored. This book is a good introduction to the death experience, to guides and guardian angels; ghosts and walk-ins. It examines different levels of existence in the spirit realms; the healing places for the damaged; the schools where you integrate lessons learned on Earth and where you discover the laws of the Universe; how you plan your next incarnation, the lessons to be learned and future karmic relationships before birth.
