"Fashion Geek" introduces a new craft of fashionable and playable electronic clothes and accessories. This book teaches basic electronic and hacking skills and combines them with simple but stylish sewing projects DIY crafters will love, including a 'Blooming Buttons' jacket with flower buttons that light up when the jacket is buttoned, a 'Get-the-Message' Bag that lights up when your mobile phone rings, and a

'Creature Feature' Hat with headphones in the earflaps. As one of the contestants on Bravo's highly-successful reality show "Project Runway", Diana Eng brings her ideas and fashion sense to life by focusing on making things customizable, beautiful, usable, fun and stylish.
