isbn:9781600610790

"Metal Clay in a Day" makes using PMC extremely accessible by taking the reader through twenty-five projects that don't require expensive, specialised equipment. Readers will learn the basics about how to cut, texturise and sculpt PMC

clay, as well as how to dry and fire it, using a propane torch. Projects such as earrings, pendants, bracelets and more will introduce readers to working with precious metal clay. An inspiring gallery for taking the clay to the next level will also be included.
