The design of a bar plays one of the most crucial roles in defining its identity and atmosphere. Drink! Best of Bar Design presents 40 contemporary projects from New York via Berlin to Shanghai, from innovative young designers as well as established architects. Bar design has considerably widened its scope, making it an exciting field of

creativity. Outlandish and colorful interiors or minimalist and reduced concepts, the projects presented show an amazing diversity how the space is organized, which materials are used and what individual style is developed.
