The popular Picture Maze series continues with its revolutionary concept and cool design! These mazes may seem ordinary—at first. But when solvers finish working their way through the twists and turns, avoiding false leads and dead ends, they get some one-of-a-kind fun. An actual picture emerges from the completed grid—including an ice skate and a frog! And, for an extra challenge, sometimes you have to color in all the wrong paths first to discover what image awaits. These mazes truly must be seen to be believed, and they make a brain-building and artistic gift for young puzzle lovers.
