isbn:9781567923889

The Inner Sky is a new selection of poems and prose by the great poet Rainer Maria Rilke, set with the original text and a facing page translation, and including more than a dozen works that have never before appeared in English. The translations, by the NEA and PEN-award-winning author and translator Damion Searls, are lively, moving, and appealing, and they give a new voice for Rilke in English: mystical but concrete, like Emily Dickinson or Gerard Manley Hopkins. Searls's selection of texts clusters around a handful of related images and ideas birds and trees, giving and receiving, working and waiting, girlhood and gardens and presents a coherent vision of how we relate to the outer world and inner world of the imagination. Scholars and students of Rilke will benefit from the German and French originals opposite the translations, and two full indices of English and original titles and first lines. An annotated chronology and the translator's afterword complete this volume.
