In this classic study from management expert Fredmund Malik, managers will find sound professional advice for successful management in their organizations. Malik offers advice for improving skills in organization, decision making, supervising, budgeting, and numerous other management-related tasks. This volume is designed for managers in business and industry, students of management, public and university administrators, and executives in other types of organizations. It can be used independently or as a companion volume to Malik's "Management: The Essence of the Craft".
