isbn:9780596003210

From the authors of "Programming ASP.NET" comes this comprehensive tutorial on writing Windows applications for Microsoft's .NET platform. Programmers already familiar with the fundamentals of the C# or Visual Basic .NET languages will appreciate

the in-depth focus and straightforward approach this new book brings to Windows development. This all-inclusive tutorial teaches experienced developers how to use .NET Windows Forms to build standalone and "rich client" applications for the Windows 9x, Windows 2000 and Windows XP desktop platforms.
