著者:Weber, George 编

出版者:Elsevier Science

出版时间:2005-04-22

装帧:Hardcover

isbn:9780080444147

A direct spinoff of the "Advances in Enzyme Regulation" journal, this internationally acclaimed series reports progress at the cutting edge in the strategic area of regulation at the molecular level. In an integrated presentation of original papers, leading scientists, Nobel Prize winners and other outstanding experts from many countries review the best research produced each year and evaluate what is newest and what promises to be the most important in clinical and basic investigations. The volumes serve as guideposts and beacons for investigators in planning research and teaching students in basic and clinical fields of endeavour. These books advance the general front of studies on metabolic regulation and the understanding of the molecular biology of control of gene expression by hormones, drugs and growth factors in cancer cells and in clinical situations of diabetes, inborn errors of metabolism and neoplasia.
