Vigorous debates swirl around issues of globalization, as global political economic relations in a nation-state system are complex and incompletely understood phenomena. The experiences of the late 1800's and first half of the twentieth century suggest that globalization requires nurturing to ensure that societies garner the advantages offered by globalization and manage the risks and fears unleashed by such dramatic transformation in social affairs. Featuring contributions by experts from a variety of disciplinary backgrounds including economics, political science and law, this edited volume offers a timely examination of the complexities surrounding modern globalization. Through discussion and evaluation of the problems associated with immigration, social welfare and income inequality, and global governance, the book offers a significant contribution to the continuing globalization debate. Providing both an overview of the debate and detailed discussion of specific examples, "Challenges of Globalization" will be of great interest to scholars of international political economy, international relations and globalization studies.
