Clever and entertaining puzzles to stretch the mind. There's no question that trivia collections, puzzle books and doodle pads are very popular, now more than ever before. How welcome is an excuse to do anything other than what should be done at any given time? "The Complete Procrastinator" is a puzzle activity book designed to stretch the mind whenever the mood strikes or to give the mind a needed rest from the routine. This unique combination of creative challenges, bizarre suggestions and doodle ideas gives procrastinators yet another opportunity to do what they do best. Usually offbeat, often hilarious and thought provoking, "The Complete Procrastinator" takes the puzzle genre beyond the ordinary, with open suggestions, puzzles without "answers" and blank slates for the user to complete. For home or office and for travel

by bus, train or plane, this format is so handy that it becomes the best doodle pad in the world.
