Selected and introduced by Richard Dawkins, The Oxford Book of Modern Science

Writing is a celebration of the finest writing by scientists for a wider audience - revealing that many of the best scientists have displayed as much imagination and skill with the pen as they have in the laboratory. This is a rich and vibrant collection that captures the poetry and excitement of communicating scientific understanding and scientific effort from 1900 to the present day. Professor Dawkins has included writing from a diverse range of scientists, some of whom need no introduction, and some of whose works have become modern classics, while others may be less familiar - but all convey the passion of great scientists writing about their science.

评论

选看了一些，丢给了跑跑

在香港时买的，在回程航班上读到古希腊人如何证明根号2是无理数还有有无数个质数的文章，真是感叹，只用到初等数学知识，思路极为巧妙，令人神清气爽，一扫旅途疲惫。不过近代科学生物方面的文章较多，比较没兴趣。
