出版时间:2007-01-26

装帧:Paperback

isbn:9780955459900

This unique book provides the easiest possible route to mastering professional

Microsoft Access VBA programming. Both IT professionals and absolute beginners will love the book as it avoids needless technical jargon and concisely explains everything you need to know in a simple and no-nonsense way. The author has over 25 years experience in database design, application development, project management and education. The emphasis throughout the book is upon solid, professional coding. The reader is gradually introduced to a set of design rules that summarise best-practice for developing Access applications. Instead of simple code snippets the book takes you through the process of creating a high-quality, sophisticated, robust Access application entirely from scratch. By the end of the course you will have a working and complete application that can be used as the basis for your own real-world projects. The massive A4 format packs up to 50% more information onto each page allowing each skill to be presented as an easily digested, focused lesson across two facing pages of A4. The Smart Method develop and run IT courses and have provided consultancy and training services to many of the world's largest companies in England, Europe and America. This book is also used as the basis of The Smart Method's Access VBA course. If you need to teach Access VBA this book is equally useful as courseware.
