What Does It All Mean? Five years ago, when neuroscientist John A. Novarro helped with a highly sensitive government investigation, he had no idea how it would change his life - separating him from his past, giving him a new identity, transforming him into Johnny Denovo, the world-famous Detective of the Mind. Now, the Denovo name is the bane of high-stakes criminals the world over. When Johnny's finely honed senses detect codes hidden in spam emails, the puzzling phrases and suggestive metaphors hint at a plot to steal rare and valuable objects. Soon, Johnny learns that something even more sinister is brewing. As he tracks the emails to their source, events explode into an adrenalized, trans-Atlantic race to prevent a geopolitical catastrophe. Will his allies, nerve, media savvy, and knowledge of the human brain be enough to unhinge the criminal mastermind? Or will he become another victim of a ruthless conspiracy? Andrew Kent is an author who lives in central Massachusetts with his wife, children, and dogs.
