Fearless Leadership is designed to help people determine how irrational fears, faulty beliefs, and the lies they believe to be true of themselves get in the way of a happy life. This book helps readers learn to create healthy beliefs and bedrock truth to guide them in the future. Fearless Leadership provides a seven-step model for understanding how people develop undesirable behaviours and what keeps them in place. It teaches readers to know the truth about themselves so they are not stopped by their own irrational reactions. Readers can then work with optimistic attitudes and embrace new challenges with confidence and courage.
