isbn:9781864703665

Living Steel is a worldwide, collaborative program designed to stimulate innovative and responsible housing design and construction.

This book presents the winning and finalist schemes from the three competitions held to date. Each project is presented with a description, drawings, sketches, plans and renderings of the submitted projects and is an inspirational source of information about sustainable steel homes and low-cost housing. The projects presented are at the vanguard of international architectural design for a world suffering from a critical housing shortage; this is a unique and valuable guidebook to state-of-the-art design and construction techniques.

Features projects in Kolkata and Warsaw, as well as in Brazil, China, the UK, and Russia.
