This is the first collection of narratives by practicing technical communicators telling their own personal stories about the workplace and their lives on and off the job. The stories vividly demonstrate the unique power of narrative as a teaching and learning

tool. Unlike fabricated cases, these real-life narratives show new and veteran technical writers at work on the job, dealing with tasks, clients, and co-workers, and revealing their insights, values, and attitudes about their work. The stories also show the skills required in the profession and the ethical and other issues raised in the course of the workday.
