Dr. William Henry OaBrien, the finest surgeon Imina, Pennsylvania, has ever known, refuses to marry the rich tyrantas daughter and is forced to leave town when the tyrant destroys all evidence of the doctoras existence. Using his initials for a name, Dr. Who heads west to meet the health needs of simple country folk in the 1800s Montana territory. Miss Penelope Poyndexter, amazed that a man would turn his back on a fortune, as well as the power and prestige that goes with wealth, rather than marry a woman he has never met, sets out to find an answer to the assault on her ego. Will Penny permit the perils of pomposity to plunge her into the painful pit of poverty? Will Dr. Who be restored to his prominent position at Poyndexter General Hospital? Will he cash in on the Poyndexter plenty or will he remain a pennyless country doctor?
